

## Title: Entry Pass System

### Team Members:

- Dhiraj Kumar Tripathi (TEA5KC) – Developer and Tester
- Adilzhan Shukenov (YMOHAO) – Developer and Tester
- Mohammad Asif Karim (GRNO1I) – Developer and Tester
- Pramod Kumar Sethy (VIP1ZR) – Designer, Tester and Documentation

### Problem:

The idea of the software is to make easy way to give or Print an access pass to any kind of events, areas etc. (conference, faculty and so on)

### How it will work?

Using our software, person should be able to enter his details in the system, enter the location where he needs to enter, pay for access and the print unique entry pass, which contains:

- Unique id
- Information about person
- Common information about labels of places or events
- Security code
- Access Rights

### Possible software:

- Visual Studio IDE
- MS-SQL Server

### Deadline:

10<sup>th</sup> May, 2017
